- Electronic Medical Records with laptops
- Free parking
- Subsidized child-care allowance

Maine-Dartmouth Family Medicine Residency (MDFMR) has a 36-year history of Family Medicine Resident training and offers a strong curriculum in inpatient and outpatient Obstetrics, Pediatrics, and Internal Medicine. Among our thirty-five clinical faculty members are seven (7) Osteopathic physicians, an obstetrician, a dermatologist and a pediatrician. There is a choice among two (2) family medicine sites, and we offer a Neuromuscular Medicine Plus One Program (NMM+1), a Geriatric Fellowship and the only dually accredited participating site for the Integrative Medicine in Residency Programs through the University of Arizona.

MDFMR encourages balance and identity outside of medicine. Residents are encouraged to get involved in the local community through social and political activism. Our location in the state capitol provides unique opportunities for participation in state health policy activities.

MDFMR is a dually approved residency that emphasizes the integration of OMM into everyday family medicine in both the inpatient and outpatient settings.
