# CSI & History

An **interdisciplinary controlled substance review process** was implemented in February 2013 with the goal of **decreasing inappropriate prescribing** of opioids and the associated patient morbidity and mortality.

## Controlled Substance Initiative (CSI) Committee

Chief medical officer, chief psychiatrist, pharmacy residents, physicians, mid-level practitioners, and care managers

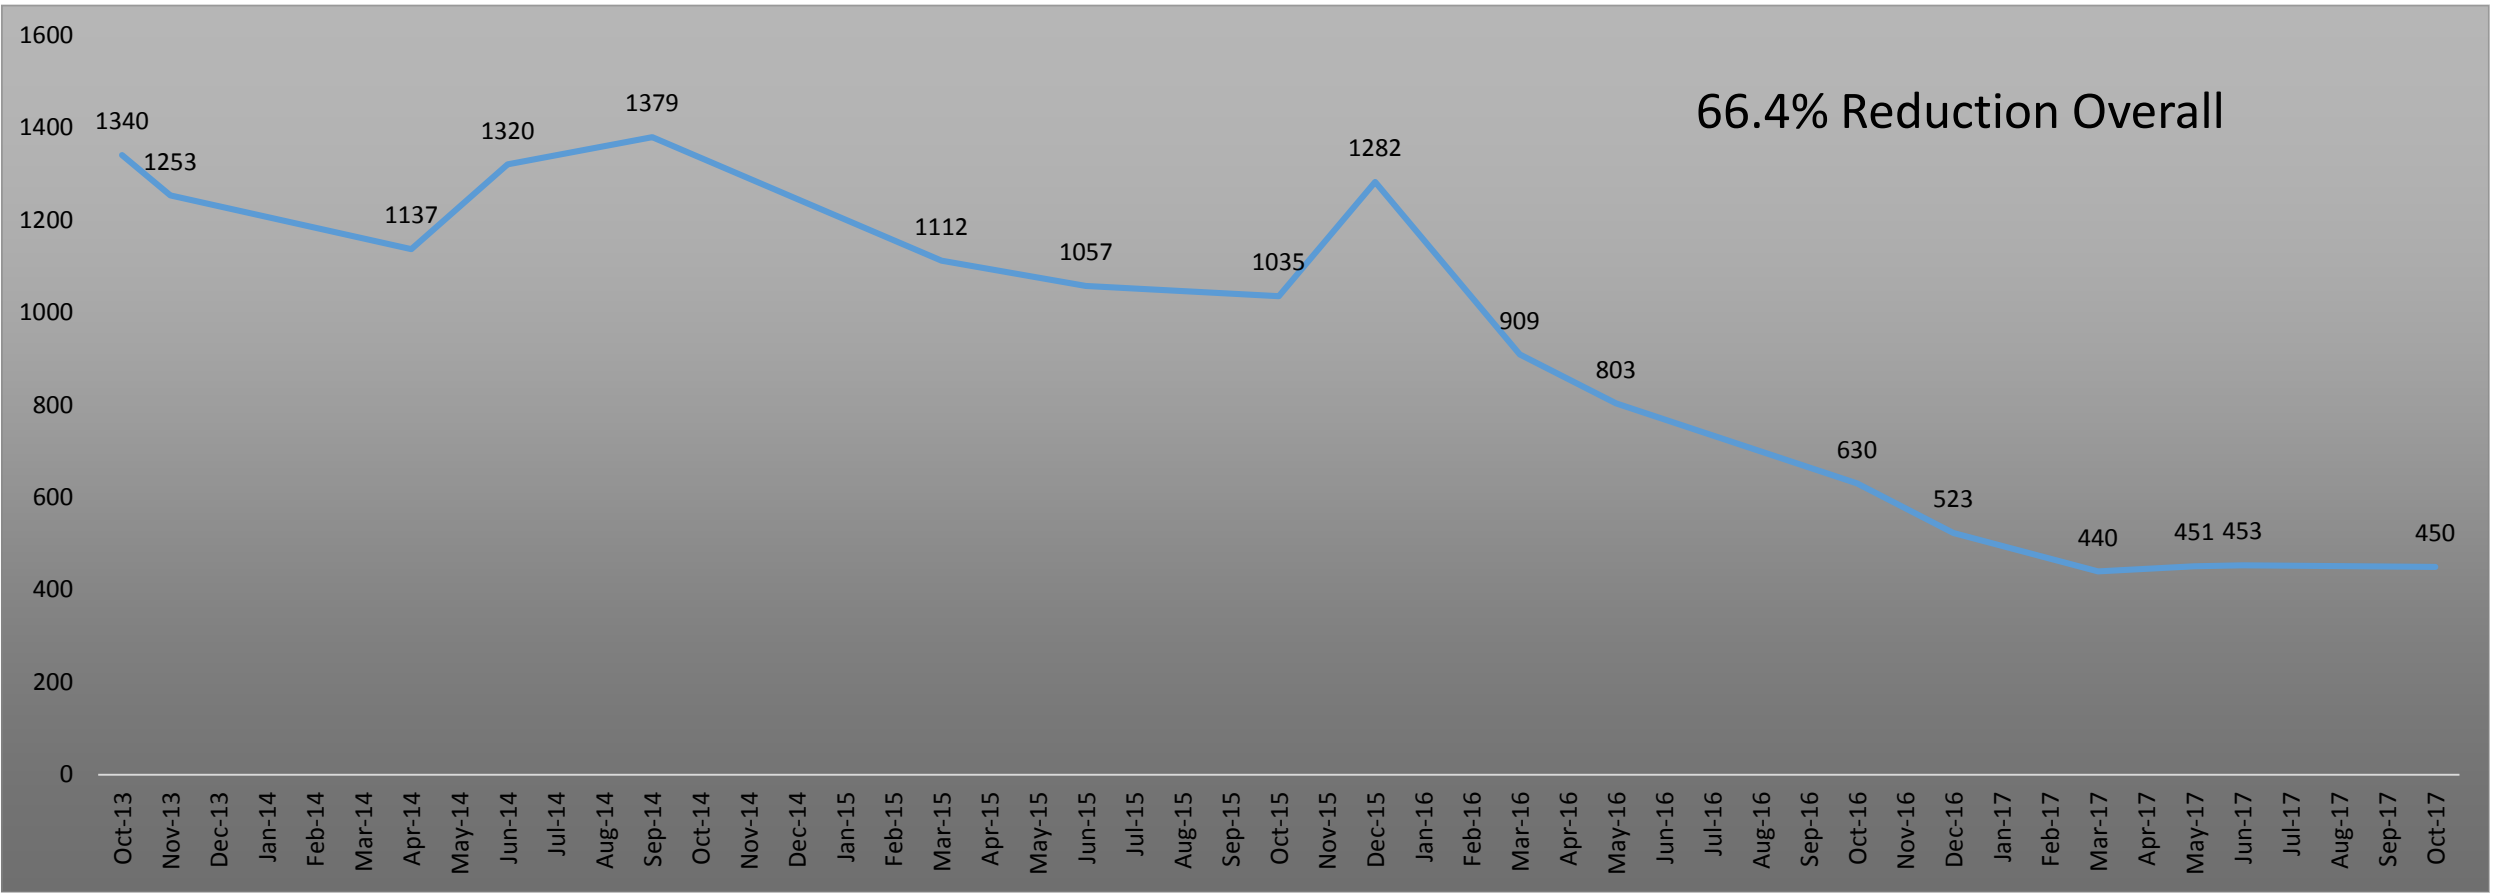

Provider-patient controlled substance agreements

Controlled substance policies with provisions for oversight

Proactive case reviews based on referrals and QI reports

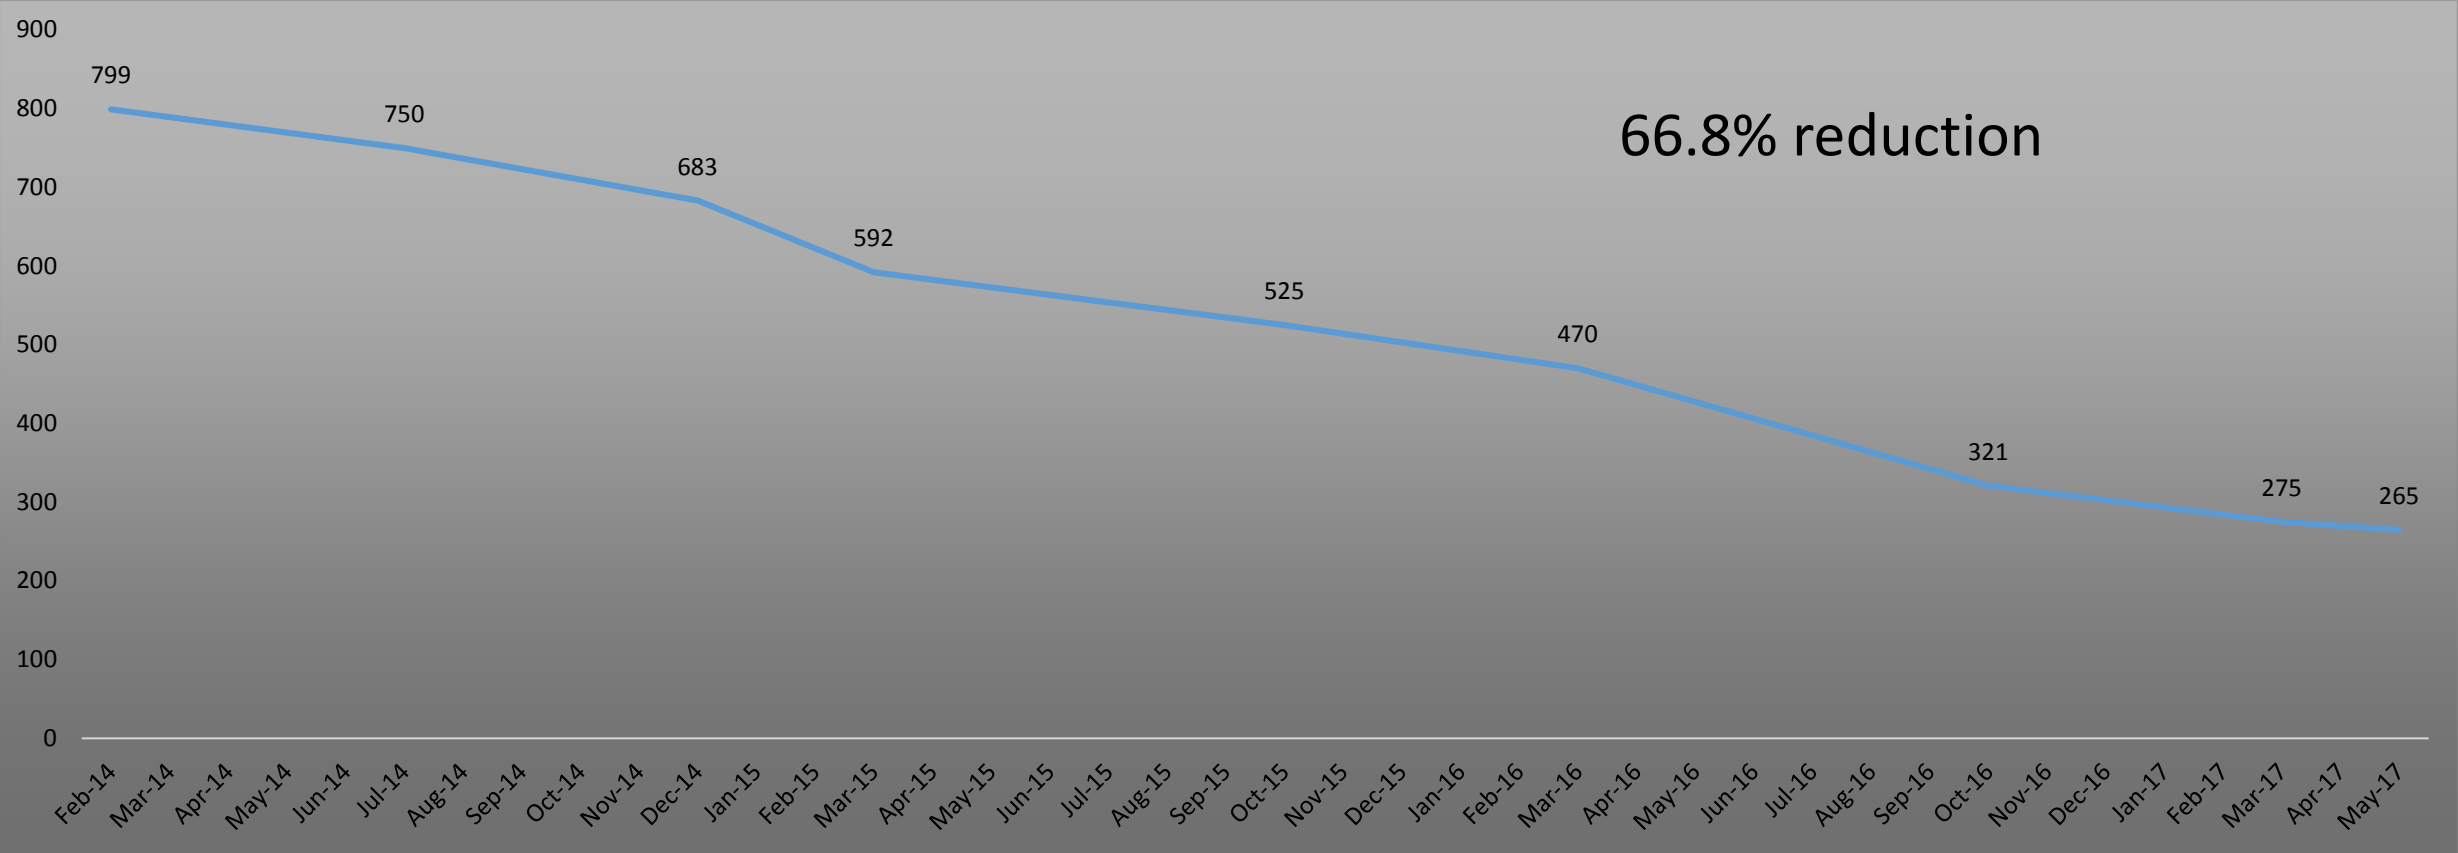

Pharmacist-driven, resident-managed array of clinical and administrative services

# Patients On Chronic Opioid Prescriptions

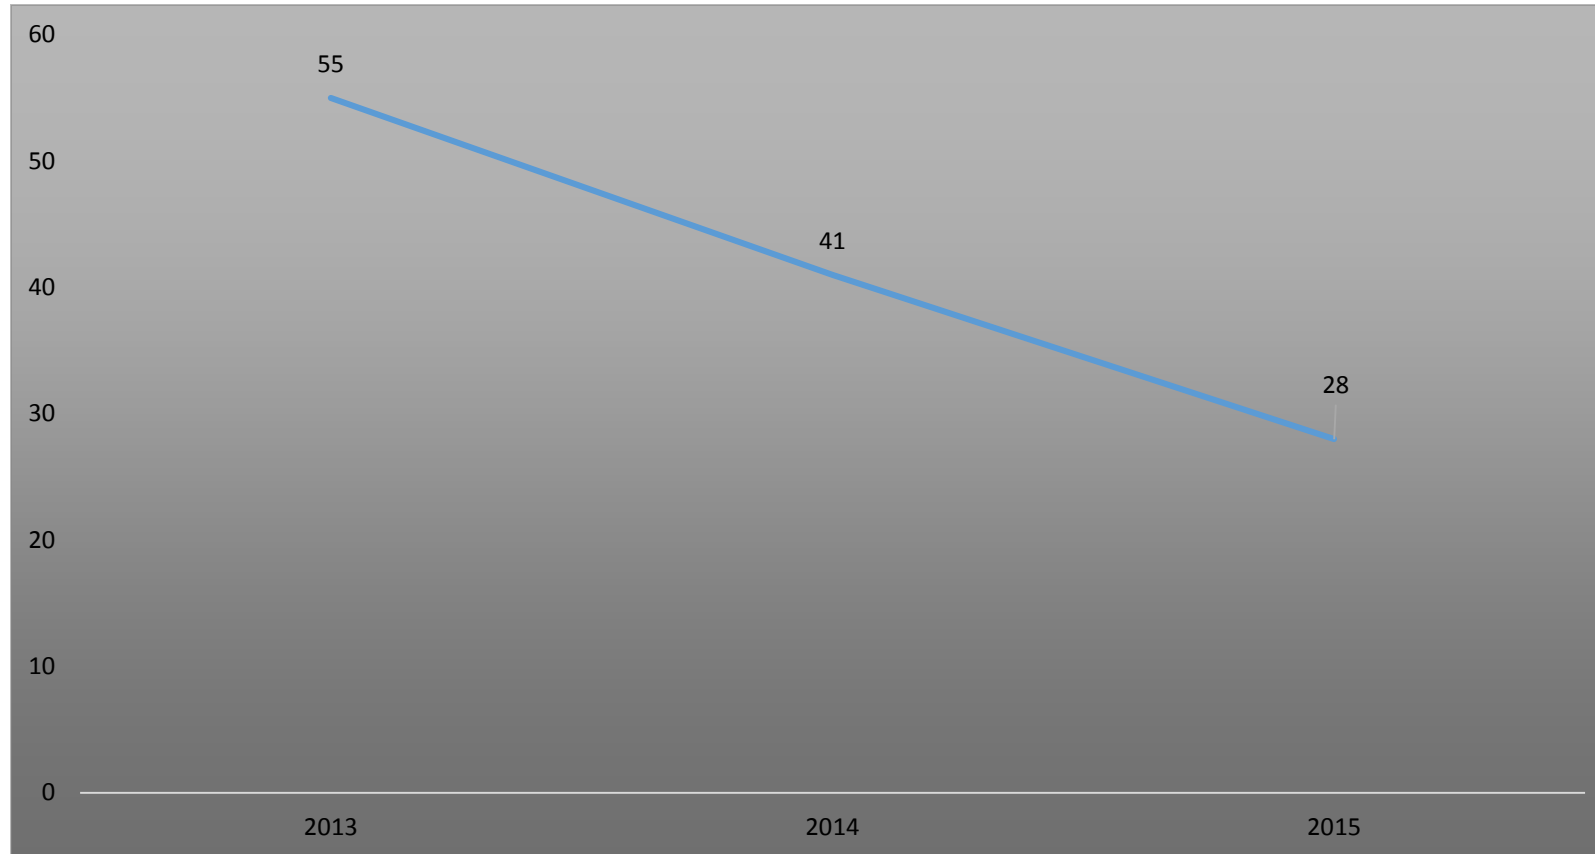

# Patients on Chronic Benzodiazepine Prescriptions

# Premature Deaths with Opioid Use

## Premature Death:

death of a patient under 60 without a terminal diagnosis, hospice, or palliative care

# Discussion of practice site and IPE

- **Jessica Bates**

# Transitions of Care

- **Transitions of Care Team consisting of a pharmacist, nurse care manager, and medical assistant**
- **Goal is to reduce 30, 60, and 90 day readmission rates**
- **Utilizing all members of the health care team**

# Break out session in groups of 2-4

- **Learners will identify interprofessional opportunities at their practice sites.**
- **Identify opportunities to improve communication with other healthcare professional**

# Large group sharing

- **Bring ideas together**
- **Panel speakers to moderate and field questions from the audience**
