Samaritan Medical Center is genuinely proud to continue the long-standing tradition of a traditional AOA Internship Program. We believe it is most consistent with the tenets laid down over time by the profession. It allows the recently graduated Osteopathic physician the opportunity to actively field test their future career options in a well-organized and meaningful fashion.

The Internship can be modified to allow for a wide variety of follow-on training programs. The Traditional Osteopathic Internship Year was the “birthright” for all Dos, and we continue to make it available despite the changing academic environments.

Samaritan Medical Center is located in the beautiful Thousand Islands Region of Upstate New York. The St. Lawrence River, Lake Ontario, and many local lakes and rivers make this a beautiful place to live and work. Ft. Drum is located nine (9) miles away, and Samaritan Medical Center is the hospital for all of the military men and women as well as their dependents.

All disciplines are taught one on one by an attending, and the daily Noon Conferences are taught by attending physicians on a variety of specialties.

OMT is demonstrated, encouraged and required. Weekly didactic sessions and OMT clinics are held in order for you to be able to increase your OMT skills.
