St. Joseph's Regional Medical Center is a 792-bed, well-organized tertiary care medical center with a superior academically-oriented faculty. The Hospital was founded in 1867 by the Sisters of Charity and has served the poor and infirm of the Paterson, NJ area and residents in the surrounding communities in northern New Jersey. It is a state-designated, Regional Level 2 Trauma Center caring for over 1,000 trauma patients every year. It has been a teaching hospital for over 30 years with over 200 Residents and Fellows.

The Osteopathic Emergency Medicine Residency Program is an exceptional program. We have an exciting teaching faculty from various teaching programs (Allopathic and Osteopathic) from across the country.

It is our intention that after four (4) years of rigorous training, the graduating Resident will be fully prepared to practice independently in all aspects of Emergency Medicine.

St. Joseph's Regional Emergency Department is one of the busiest in the State of New Jersey.
