Approaches to Preventing Chronic Diabetes Complications presentation. This program is free; it is provided by Program Management Services, Inc and an education grant from Novo Nordisk, Inc. There is no separate fee for this program.

Objectives

Current Approaches to Preventing Chronic Diabetes Complications

1) Describe the major chronic complications of diabetes. 2) Review the epidemiology and impact of major chronic complications of diabetes in the United States. 3) Describe current approaches for preventing the development of major chronic complications of diabetes in adults with type 2 diabetes.

Compounding for Technicians: Techniques, Concepts and Regulation

1) Describe basic non-sterile compounding techniques. 2) List the factors that must be considered when determining a beyond use date for a compounded product. 3) Identify the elements of a master formulation record. 4) Describe the role of USP 795

"GET SMART!" on Antimicrobial Stewardship

1) Review the elements necessary to create a stewardship program as recommended by the Center for Disease Control (CDC), The Joint Commission and the Center for Medicare and Medicaid Services. 2) Discuss the recently approved Joint Commission Standard and their effect on stewardship programs. 3) Assess the Center for Medicare and Medicaid's recommendation related to stewardship programs. 4) Delineate helpful tools for every pharmacist's stewardship toolbox.

2016 New Drug and Clinical Update

1) List 10 new drugs that have been approved by the FDA in the past year. 2) Understand the benefits and risks of these new medications. 3) Discuss significant drug-related developments over the past year.

Ph 700s Standards of Practice for Pharmacists and Pharmacies

1) Review the changes to Ph 700s, known as the standards of practice rules and how they affect today's practice setting including: Reduction in paperwork, Pharmacist in Charge (PIC) requirements, PIC responsibilities, Permit holder's responsibilities, Counselling mandates, Prescription transfers. 2) Recall the responsibility of the pharmacist and the technician under the new rules (technician). 3) Identify the classes of drugs requiring mandatory counselling. 4) List new permit holder responsibilities (technician).

New Hampshire Opioid Epidemic and the State's Response

1) Recall statistics about the statewide opioid crisis (technician). 2) Summarize the state's response to: prevention, intervention, treatment and recovery supports (technician). 3) Identify signs and symptoms of overdose. 4) Demonstrate naloxone administration.

Accreditation Information

The University of New England is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This program will provide 5 contact hours (0.5 CEU's) of Continuing Pharmacy Education credits for completion of this knowledge based activity. Attendance and completion of the program evaluations are required for statements of credit. Attendees must complete a Program Evaluation Form after each presentation. CPE credits will be posted on the CPE Monitor using your NABP# within 30 days of the program.
