ACCREDITATION INFORMATION

University of New England, College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. This program will provide the participant with 5.0 contact hours (0.5 CEUs) of continuing pharmacy education credit for completion of this knowledge-based activity. Attendance and completion of program evaluations are required for statements of credit. Attendees must complete a Program Evaluation Form immediately after each presentation.

PROGRAM OBJECTIVES

NH PDMP: An Integrated Tool in the System of Care

- Understand the implementation & development of the PDMP
- Understand how the PDMP is a valuable resource
- Understand how the PDMP can be used in NH

Current Topics in Pharmacy: An Update from ASHP

- Describe the pharmacy profession's efforts in pursuing provider status at the national level and what impact this has at the state level and what can be done to prepare
- Discuss current status of the national opioid epidemic
- Describe workforce trends and the importance of clinician well being and resilience

Risk Reduction: Implementing Changes to Prevent Patient Harm

- Identify four risk reduction principles
- Distinguish between advantages and disadvantages for each type of risk reduction strategy
- Analyze a patient case to identify contributing factors and develop risk reduction recommendations for each

New Hampshire Resident Clinical Pearls

Drug Therapies for ACEI-Induced Angioedema:

Discuss the available pharmacologic treatment options of ACE- induced angioedema

Orthostatic Tremor: Review the current treatment options and apply the knowledge to a question at the end of the presentation

Antimicrobials for Surgical Site Infection

Prevention: Describe appropriate use of antimicrobials for surgical site infection prevention

Shingrix®: The Advantages Over Zostavax® To discuss the advantages of the new Shingrix® vaccine over the previously preferred Zostavax®

Procalcitonin: A New Biomarker for Pharmacists

Describe the current indications for the use of procalcitonin monitoring and its implications in antimicrobial stewardship

Iron Deficiency in Heart Failure: Evaluate treatment options for a patient with co-morbid heart failure and iron deficiency anemia

Pros of Probiotics in Clostridium difficile Infection:

Discuss outcomes of recent meta-analysis on the use of probiotics to prevent Clostridium difficile infection in hospitalized patients

Usage and Roles of Direct Oral Anticoagulant

(DOAC) in the Obese Population: Assess the role of DOACs in the obese population
